Vanguard LifeStrategy® 40% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy® Funds ICVC

A GBP Income Shares

ISIN: GB00B41F6L43

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to achieve income and/or capital returns through a portfolio comprising approximately 40% stocks and 60% bonds.
- The Fund gains exposure to stocks and bonds by investing predominantly in Vanguard passive index funds. Direct investment in stocks and bonds may also be made.
- The Fund will have exposure to UK and non-UK stocks (including emerging markets), and to Sterling-denominated and non-Sterling-denominated bonds (including government bonds, index-linked bonds and UK investment-grade bonds). The UK will generally form one of the largest single country exposures for stocks and bonds.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund is more appropriate for long term investments.
- Income from the Fund will be paid out.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

For further information about the objectives and investment policy of the Fund, please see Appendix 1 of the Vanguard LifeStrategy Funds ICVC prospectus (the "prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors and Performance" section of the prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.22%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their financial adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2018. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the prospectus on our website at <https://global.vanguard.com>

Past performance

• Past performance:

1. **Is not a reliable indication of future performance.**
 2. Includes ongoing charges and the reinvestment of income. It excludes entry and exit fees.
 3. Has been calculated in GBP.
- Shares in the Fund were first issued in 2011. This share class was launched in 2014.

Practical information

- **Depositary:** The Vanguard LifeStrategy Funds ICVC ("VLF") depositary is State Street Trustees Limited.
- **Documents, prices of shares and further information:** You can obtain copies of the prospectus and the latest annual and semi-annual report and accounts for VLF, along with the latest published prices of shares and other information on the Fund, free of charge from Vanguard Investments UK, Limited, P.O. Box 10315, Chelmsford CM99 2AT (tel. 0800 408 2065) or from our website at <https://global.vanguard.com>. These documents are available in English only.
- **Sub-funds:** VLF is an umbrella Fund with segregated liability between sub-funds. This means that the assets of the Fund are maintained separately under law from the assets of the other sub-funds of VLF, and each sub-fund is insulated from any liabilities or claims associated with the other sub-funds.
- **Shares:** The Fund is part of VLF and has both accumulation and income shares. You may switch some or all of your shares of one type to shares of another type within the same Fund or between other funds of VLF. An entry charge may apply. Details of switching are provided in the prospectus.
- **Tax:** UK tax legislation may have an impact on your personal tax position. You are recommended to consult your professional tax adviser.
- **Liability:** VIUK may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for this Fund.
- **Remuneration policy:** Details of the Vanguard European Remuneration Policy are available at <https://global.vanguard.com/portal/site/portal/ucits-investment-information> including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits, including the composition of Vanguard's European Remuneration Committee. A paper copy of these details may be obtained, free of charge, on request from the Head of Human Resources, Europe; Vanguard Asset Services, Limited; 4th Floor; The Walbrook Building; 25 Walbrook; London EC4N 8AF.

Legal & General Multi-Index 4 Fund Class I Income - ISIN: GB00B8VZBR34

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The Fund objective is to provide a combination of growth and income and to keep the fund within a pre-determined risk profile. The Fund's potential gains and losses are likely to be limited by the objective to stay within its particular risk profile.
 - The Fund is part of a range of risk profiled funds. The target risk profile for the Fund is set by an independent agency*, and is based on the historic return and volatility of different asset types. The risk profile ranges from 1-10 with 1 being the least risky, and 10 being the most. This Fund aims to stay within risk profile 4. We use our experience and research, together with research and allocation guidelines from this independent agency* to restrict the types of assets held and the allocation of each asset type to stay within the target risk profile.
 - The Fund will have exposure to company and government bonds (a type of loan that pays interest), cash, company shares and UK commercial property. The Fund will have a bias towards company and government bonds.
 - The bonds the fund is exposed to may be investment grade or sub-investment grade. Investment grade means that the bond is rated as lower risk by a rating agency, while sub-investment grade bonds will be classed as higher risk, but with a potentially higher return.
 - In order to achieve this exposure, at least 75% of the fund will be invested in other authorised investment funds. At least 50% of the fund will be invested in index-tracker funds which are operated by Legal & General.
 - The Fund may also invest in money market instruments (a form of loan that pays interest and is designed to have a stable value) and bank deposits.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- Your units will be income units. Income from the Fund's investments will be paid out to you every six months (as a dividend). This will reduce your capital growth accordingly.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is primarily designed for investors:
 - who have received advice and had their attitude to risk assessed and matched to the risk profile of this Fund but may be appropriate for those investors who have considered the risk profile of this Fund with the others in the Multi-Index range;
 - who are looking for growth from an investment in company and government bonds (a type of loan that pays interest), cash, company shares and UK commercial property.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - To help you understand this Fund, its risk profile and how it compares to others in the range we have created a guide www.legalandgeneral.com/mi-guide.
 - We recommend you read our guide to the Fund range to help you decide if this is the right fund for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 4 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
 - Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - By investing in other funds this fund indirectly holds bonds and property that are traded through agents, brokers or investment banks or directly between buyers and sellers. This makes them less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- * **The Fund targets risk profile 4 as calculated by Distribution Technology ('DT'). They are an independent agency who provide risk profiling tools to advisers and fund managers. The Risk and Reward profile scale above is calculated differently to the DT Risk Profiles. The DT profiles range from 1 to 10 with 10 being the highest (rather than a scale of 1 to 7 for the Risk and Reward profile).**

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.31%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
 - The ongoing charges figure is based on the latest available expenses at December 2018. This figure may change in the future.
 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.62% higher than the selling price at 31 December 2018.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested. The figures do not take account of any bid-offer spread or dilution levy or any transaction costs.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2013.
- This unit class launched in 2013.

Non-UCITS retail scheme Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Strategy Conservative Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Inc C
ISIN: GB00BYVXB14

Objectives and Investment Policy

- The aim of the Fund is to provide capital growth through diversified investment across global markets with a bias towards fixed interest securities (fixed interest securities, including bonds and gilts, are a type of loan taken out by companies and governments that pay interest).
- This is one of a range of actively managed Global Strategy Portfolios offered at five different risk levels. The asset allocation of each fund in the range reflects the risk level. The Fund is rated as 2, where 1 is a lower level of risk and 5 is a higher level of risk. The Fund is managed with the aim of maximising returns in line with its agreed long term risk profile. Therefore any potential gains are likely to be limited by the risk profile of the Fund.
- The level of risk stated is to allow investors to compare the risk relative to other Global Strategy Portfolios. This differs from the Risk and reward profile opposite. This is information we are required to provide by regulation, which allows investors to compare the risk for different Funds.
- The Fund aims to meet its objective with a focus on lower ongoing charges. The Fund aims to provide sufficient diversification across asset classes and the focus on lower ongoing charges may mean that certain asset classes aren't considered.
- To achieve its aim the Fund will invest primarily in collective investment schemes (funds), including exchange traded funds, which generally aim to track the performance of market indices. Such assets shall, in turn, invest in fixed interest securities, equities (shares of companies), property companies and real estate investment trusts that make up the index.
- Currently 73% of the Fund invests in collective investment schemes that aim to track the performance of an index.
- The collective investment schemes that the Fund invests in will, where possible, be those managed or operated by the ACD or an associate of the ACD. Where this isn't possible the Fund may invest in collective investment schemes operated by third party fund providers.
- The Fund may also invest directly in fixed interest securities, equities, property companies and real estate investment trusts where exposure to an asset class can be adequately achieved with a relatively low number of holdings.
- The Fund may use derivatives (financial instruments whose value is based on an underlying asset) for investment purposes. Using derivatives for investment purposes means, in particular, maintaining positions in the investments for the longer term. Derivatives may also be used to offset against movements in currency exchange rates, falls in asset values and reducing the risk associated with changes to prices within the market. However, it is envisaged that the use of derivatives will not be extensive and will not affect the overall risk profile of the Fund.
- Under normal market conditions, the Fund will have the following asset class exposures: Equity: 15-45%, Fixed Interest: 40-85%, Property Securities: 0-15%. These percentages will fluctuate based upon market movement and adjustments to the asset allocation to enable the Fund to meet its aim.
- The Fund may also invest in money market instruments, deposits and cash to manage day-to-day cash flow requirements.
- Income is distributed.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment fund risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.18%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/10/2018. Charges may vary from year to year.

Further information on Charges can be found in the "Charges and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The Fund was launched on 23 August 2017.

Global Strategy Balanced Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Inc C
ISIN: GB00B7PHDP01

Objectives and Investment Policy

- The aim of the Fund is to provide capital growth through diversified investment across global markets.
- This is one of a range of actively managed Global Strategy Portfolios offered at five different risk levels. The asset allocation of each fund in the range reflects the risk level. The Fund is rated as 3, where 1 is a lower level of risk and 5 is a higher level of risk. The Fund is managed with the aim of maximizing returns in line with its agreed long term risk profile. Therefore any potential gains are likely to be limited by the risk profile of the Fund.
- The level of risk stated is to allow investors to compare the risk relative to other Global Strategy Portfolios. This differs from the Risk and reward profile opposite. This is information we are required to provide by regulation, which allows investors to compare the risk for different Funds.
- The Fund aims to meet its objective with a focus on lower ongoing charges. The Fund aims to provide sufficient diversification across asset classes and the focus on lower ongoing charges may mean that certain asset classes aren't considered.
- To achieve its aim the Fund will invest primarily in collective investment schemes (funds), including exchange traded funds, which aim to track the performance of market indices. Such assets shall, in turn, invest in equities (shares of companies), fixed interest securities (fixed interest securities, including bonds and gilts, are a type of loan taken out by companies and governments that pay interest), property companies and real estate investment trusts that make up the index.
- Currently 63% of the Fund invests in collective investment schemes that aim to track the performance of an index.
- The collective investment schemes that the Fund invests in will, where possible, be those managed or operated by the ACD or an associate of the ACD. Where this isn't possible the Fund may invest in collective investment schemes operated by third party fund providers.
- The Fund may also invest directly in equities, fixed interest securities, property companies and real estate investment trusts where exposure to an asset class can be adequately achieved with a relatively low number of holdings.
- The Fund may use derivatives (financial instruments whose value is based on an underlying asset) for investment purposes. Using derivatives for investment purposes means, in particular, maintaining positions in the investments for the longer term. Derivatives may also be used to offset against movements in currency exchange rates, falls in asset values and reducing the risk associated with changes to prices within the market. However, it is envisaged that the use of derivatives will not be extensive and will not affect the overall risk profile of the Fund.
- Under normal market conditions, the Fund will have the following asset class exposures: Equity: 40-70%, Fixed Interest: 20-60%, Property Securities: 0-15%. These percentages will fluctuate based upon market movement and adjustments to the asset allocation to enable the Fund to meet its aim.
- The Fund may also invest in money market instruments, deposits and cash to manage day-to-day cash flow requirements.
- Income is distributed.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment fund risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Premier Multi-Asset Conservative Growth Fund – Class C Shares

A sub-fund of Premier Funds

Class C Accumulation Shares, ISIN no.GB00B1J7CP79

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The aim of the Fund is to steadily grow the value of your original investment over the long term.

This Fund will invest in a broad range of investments such as funds from different investment groups and structured investments that, when taken together, are expected to have a lower risk profile than investing in company shares directly.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms Explained:

Accumulation Shares: any income made by the Fund will be reinvested to grow the value of your investment.

Funds: a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

Structured investments: a group of financial instruments which frequently combine the potential upside of market performance with limited downside. They may also provide a fixed return in exchange for accepting a degree of risk or may generate gains from market falls. They can also be used within a Fund to help manage the impact of large stockmarket fluctuations.

Transferable securities: a general term used to describe a broad range of investments such as bonds and company shares for example.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked as 3 because it has experienced low to medium rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests and the direct investments are diversified and chosen to produce a lower volatility than a fund investing solely in equities.

The indicator may not take fully into account the following risks of investing in this fund:

- Credit risk: if the issuer of an underlying security is unable to make income payments or to repay its debt.
- Liquidity risk: during difficult market conditions some securities, such as structured investments, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; The Fund does not currently hold any securities which have suspended redemptions.
- Structured Investments: these investments are usually linked to the performance of an underlying index or group of assets and may, if certain criteria are met, experience a swift change in value.
- Counterparty risk: arising from securities which require a specific entity, usually a large bank, to honour its obligations to the fund.
- Legal or tax risk: arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Premier Multi-Asset Growth & Income Fund – Class C Shares

A sub-fund of Premier Multi-Asset Fund 2

Class C Income Shares, ISIN no.GB00B78H4K93 (representative share class) & Class C Accumulation Shares, ISIN no.GB00BTHH0C86

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The aim of the Fund is to grow the value of your original investment over the long term and provide you with an income, paid twice a year.

The Fund will mainly invest in a broad range of funds from different investment groups. These underlying funds will invest in a range of different assets including bonds, company shares, property and alternatives assets and which can cover the world's stockmarkets. The Fund may also hold other types of investment, including company shares, structured investments and fixed income assets.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

The underlying assets held by the funds in which the Fund invests include equities which, as an asset class, tend to experience higher volatility than bonds or money market instruments, but this is tempered by diversification across other asset classes. The Fund is geographically diversified which reduces its vulnerability to adverse market sentiment in any one location but also exposes the Fund to additional risks.

The level of targeted income is not guaranteed and may not be achieved.

The indicator may not take fully into account the following risks of investing in this fund:

- Credit risk: if the issuer of an underlying security is unable to make income payments or to repay its debt.
- Liquidity risk: during difficult market conditions some underlying securities, such as emerging market equities or bonds, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; The Fund does not currently hold any securities which have suspended redemptions.
- Operational risk: arising from underlying investments in overseas markets, in particular emerging market countries, which may not have the same level of safekeeping or other controls as UK markets.
- Legal or tax risk: arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Royal London Sustainable Diversified Trust (Income - Class C Shares)

ISIN: GB00B844WJ68

This Fund is managed by RLUM Limited

Objectives and investment policy

Objective The Fund aims to provide growth in the value of your investment over time, by investing mainly in UK shares and UK fixed income bonds. The Fund is also invested in other types of investment, such as overseas shares, overseas government bonds, overseas corporate bonds, cash, property-related investments and derivatives.

Policy The investments picked for this Fund are screened in accordance with the Manager's ethical and sustainable investment policy. This policy applies an ethical screen to exclude companies that conflict with specific ethical concerns (e.g. the sale of weapons or tobacco) and a sustainable screen then applies positive criteria, seeking out companies that aim to mitigate environmental and social challenges and improve quality of life. This means the Fund will not invest in all areas of the market. Further details of this policy can be found in the Fund's Prospectus. Between 20-60% of the Fund's investments are in the shares of companies. At least half of the Fund will be invested in shares and securities of UK companies. At least 30% of the Fund's investments are in bonds issued by governments or investment grade companies.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

UK companies Companies which are established in the UK or which carry out a significant part of their activities in the UK

Overseas companies Companies which are established outside of the UK or which carry out a significant part of their business activities outside of the UK.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The Fund is shown in risk category 4 because its unit price has shown a medium level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by governments are typically less volatile than bonds issued by corporations. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

This Fund has a mixture of bonds, money market instruments and shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically. A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category. The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe. The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk: Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Credit Risk: Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Exchange Rate Risk: Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk: In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Derivative risk Investing in derivatives, including commodity derivatives, carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the Fund being leveraged (where economic exposure, and thus the potential for loss by the Fund exceeds the amount it has invested) and in these market conditions leverage may magnify losses.

For full details of the Fund's risks, please see the prospectus which may be obtained from (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge 0.00%

Exit charge 0.00%

Charges taken from the fund over a year:

Ongoing charge 0.77%

Charges taken from the fund under specific conditions:

Performance fee none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses as at 31 July 2018. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more information about charges please see the Fund's prospectus, available at (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

This Fund was launched on the 24 July 2009 and the share class on 26 November 2012.

The Royal London Sustainable Diversified Trust (Income - Class C Shares) in GBP

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.
