## Fidelity Allocator World Fund

a sub-fund of Fidelity Investment Funds IV

W Accumulation Shares (ISIN: GB00B9777B62)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- The fund aims to increase the value of your investment over a period of 5 years or more through global exposure to higher risk assets.
- The fund will invest at least 70% into funds that use an 'index tracking' (also known as 'passive') investment management approach (these may include funds managed by Fidelity), with the aim of pursuing a lower cost investment approach.
- The remainder will be invested in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund may also use derivatives with the aim of achieving the investment objective.
- The fund aims to allocate investment of its money as follows: 100% to higher risk assets such as shares in global, smaller and emerging market companies but this may change with market conditions. The Investment Manager will actively select investments for the fund. As part of the investment process, the Investment Manager aims to maintain a fixed allocation of 100% in higher-risk assets (such as global equities, global emerging market equities, global smaller companies and global property securities). This allocation, as well as the breakdown of higher-risk and lower-risk assets, may change according to prevailing market conditions and the efficient management of the portfolio, and will be periodically rebalanced back to its target allocation.
- As part of the fund's asset allocation process, the Investment Manager will aim to maintain an underlying static asset allocation that is designed in-house and based on proprietary capital market assumptions using quantitative research. For these higher-risk assets, the fund will aim to maintain an allocation of at least 70% in global equities with the remainder spread across assets including global real estate investment trusts, global small cap and emerging market equities.
- The Investment Manager rebalances the strategy regularly back to these static asset allocations and has discretion over when to do so. However, the Investment Manager does not take relative positions 'overweight' or 'underweight' versus this static mix. The fund does not aim to outperform this static asset allocation.
- The fund is actively managed without reference to a benchmark.
- The fund has full discretion in its choices of investments within its objectives and policies.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.

## Charges for this fund (ISIN: GB00B9777B62)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges 0.25%

### Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.

The ongoing charges figure is based on expenses for the year ending 31/10/2020. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

## Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 05/02/2013. This class was launched on 05/02/2013. Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '\*'; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

# FTSE All-World Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");  
managed by HSBC Global Asset Management (UK) Limited

Class: Income C  
ISIN: GB00BMJJJG09

**Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.**

## Objectives and Investment Policy

- The Fund aims to provide **growth** over the long term, which is a period of 5 years or more, by tracking the performance of the FTSE All-World Index (the "Index").
  - The Index measures the performance of large and medium sized companies in developed and **emerging markets**.
  - The Fund will invest in a representative sample of the shares (**equities**) of companies that make up the Index and possibly some securities that are not included in the Index that are designed to help the Fund track the performance of the Index.
  - The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
  - The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
  - The anticipated **tracking error** for the Fund is expected to be up to 0.20%.
- Use of derivatives**
- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
  - Income is distributed.
  - You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
  - Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

## Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

### Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

### Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

## Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charge	0.13%
----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure shown here is an estimate of the charges. The ongoing charges figure shown is an estimate due to a material change in the fee structure. The Fund's annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

## Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the FTSE All-World Index.
- The Fund was launched on 25 July 2014.

## Practical Information

### Depositary

State Street Trustees Limited.

### Further information

Further information about the OEIC including the latest Prospectus, latest published prices of shares, annual report and half yearly report may be obtained free of charge, in English, from the Administrator, HSBC Global Asset Management (UK) Limited, PO Box 3733, Royal Wootton Bassett, Swindon SN4 4BG or by visiting [www.assetmanagement.hsbc.com](http://www.assetmanagement.hsbc.com). The most recent Prospectus is available in English. This document describes a single share class of the OEIC. The Prospectus, annual and half yearly reports are prepared for the entire OEIC.

### Share classes

Other share classes are available, as detailed in the Prospectus. It is possible to convert your shares into a different share class or switch your shares into a different Fund within the OEIC. Details of how to do this are in the Prospectus (please note an initial charge may apply).

### Remuneration Policy

The Remuneration Policy of the Authorised Corporate Director, which describes the remuneration practices and governance arrangements for UCITS and AIFMD Authorised entities, is available at [www.assetmanagement.hsbc.com](http://www.assetmanagement.hsbc.com) (please select "About Us" then "Our Governance" then "Remuneration Practices and Governance Arrangements for UCITS and AIFMD Authorised Entities") or on request free of charge from the Administrator.

### Tax

UK tax legislation may have an impact on your personal position.

### Management Company

HSBC Global Asset Management (UK) Limited, the Authorised Corporate Director, may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the OEIC.

### Segregated liability

The OEIC is an umbrella investment company with segregated liability between Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Global Asset Management (UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority.

## Global Strategy Adventurous Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");  
managed by HSBC Global Asset Management (UK) Limited

Class: Income C  
ISIN: GB00BYVXBG82

**Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.**

### Objectives and Investment Policy

- The Fund aims to provide **growth** in line with its risk profile in the long term, which is a period of 5 years or more.
- This is one of a range of **actively managed** Global Strategy Portfolios offered at five different risk levels. The Fund is rated as 5, where 1 is a lower level of risk and 5 is a higher level of risk.
- The level of risk stated is to allow investors to compare the risk relative to other Global Strategy Portfolios. This differs from the Risk and reward profile below, which we are required to provide by regulation and which allows investors to compare the risk for different types of funds.
- As the Fund is managed with the aim of maximising **returns** in line with its long term risk profile any potential **returns** are likely to be limited by the risk profile of the Fund.
- To achieve its objective the Fund will invest a minimum of 80% in other funds, including funds which aim to track the performance of **market indices**. The other funds will in turn invest in a range of asset types such as shares of companies (**equities**), **bonds** and property that make up the index. The Fund will be invested across global markets and typically the Fund will have a bias towards asset classes that focus on **equities**.
- The other funds that the Fund invests in will, where possible, be those managed by the **HSBC Group**. Where this isn't possible the Fund may invest in funds managed by other fund providers.
- The Fund may invest up to 20% of its value directly in asset types such as **bonds** where the investment objective can be more efficiently achieved, as well as cash.
- The Fund aims to meet its objective with a focus on lower ongoing charges. This is taken into consideration when deciding which asset classes the Fund will invest in and how the Fund achieves exposure to those asset types.
- The **asset allocation** of each fund in the range reflects the risk level. Under typical market conditions, the **asset allocation** of the Fund will be as follows: **Equities**: 75%-100%, **Bonds**: 0%-25%, Other asset types, including cash: 0%–25%. These percentages will fluctuate based upon market movement and adjustments to the **asset allocation** to enable the Fund to meet its aim.

#### Use of Benchmarks

- The Fund is not managed with reference to a benchmark. The performance of the Fund is compared against the performance of funds that are part of the Morningstar Adventurous Allocation Category, with both **returns** and **volatility** considered in the comparison.

#### Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**, and for broader investment purposes to help the Fund meet its objective. In particular **derivatives** will be used to reduce or increase the Fund's exposure to different types of assets and to reduce the risk associated with movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The Fund does not intend to use **derivatives** extensively and their use will be consistent with the risk profile of the Fund.
- Income is distributed.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

#### Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.

## SUSTAINABLE FUTURE GLOBAL GROWTH FUND

KEY INVESTOR  
INFORMATION  
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Global Growth Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 2 Acc class (ISIN: GB0030030067). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

### Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

### Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest in companies globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The Fund will typically invest 95% (minimum 90%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- Investments in emerging market securities will be limited to 20%.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
  - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
  - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
  - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

## Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology adopted by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily due to its exposure to global equities.
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - any company which has high overseas earnings may carry a higher currency risk;
  - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Objectives and investment policy

**Objective** The Fund's investment objective is to achieve capital growth over the medium term, which should be considered as a period of 3-5 years.

The Fund's performance target is to outperform, after the deduction of charges, the MSCI All Countries World Net Total Return Index GBP (the "Index") by 2.5% p.a. over rolling 3 year periods.

The Fund is actively managed.

**Policy** At least 80% of the Fund will be invested in the shares of companies globally, both in developed or emerging markets. These will be companies that are deemed to make a positive contribution to society. Investments in the Fund will adhere to the Investment Manager's ethical and sustainable investment policy. The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. The Investment Manager avoids investing in tobacco and armament manufacturers, nuclear-power generators, and companies that conduct animal testing (other than for purposes of human or animal health, and/or where it is required by law or regulation). This exclusion policy helps to avoid companies the Investment Manager believes expose investors to unacceptable financial risk resulting from poor management of ESG issues.

The Fund's ethical and sustainable investment policy may change from time to time to reflect new developments and research in the field of sustainable investment. Investors in the Fund will be notified of any material changes to this policy. Investors can view the current policy at [www.rlam.co.uk](http://www.rlam.co.uk).

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. The Fund may invest up to 20% in other transferable securities, money market instruments, cash and deposits. The Fund may use derivatives, but for efficient portfolio management purposes only.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

**Equities** Securities that represent an ownership interest in a company.

**Environmental, social and governance** A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund. *Class R shares are available only at the discretion of Royal London Unit Trust Managers.*  
*Class S shares are available only at the discretion of Royal London Unit Trust Managers.*

### Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 5 because its simulated price has shown a medium to high level of volatility historically. The SRRI was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, shares are typically more volatile than money market instruments and bonds.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Investment Risk** The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

**Concentration risk** The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

**EPM Techniques** The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

**Exchange Rate Risk** Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

**Emerging Markets Risk** Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

**Counterparty Risk** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

<b>Entry charge</b>	None
---------------------	------

<b>Exit charge</b>	None
--------------------	------

### Charges taken from the fund over a year:

<b>Ongoing charge</b>	0.72%
-----------------------	-------

### Charges taken from the fund under specific conditions:

<b>Performance fee</b>	None
------------------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

### Vanguard FTSE Global All Cap Index Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Inc

ISIN: GB00BD3RZ475

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

## Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Global All Cap Index (the "Index").
- The Index is a market-capitalisation weighted index representing the performance of large, mid-sized and small company shares in developed and emerging markets around the world. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body. Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
  1. Track the performance of the Index by investing in a representative sample of Index constituent shares.
  2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management").
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be paid out.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which units in the Fund cannot be sold is available on: <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

**For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC (the "prospectus"). See the Practical Information Section for details of how to obtain a copy of the prospectus.**

## Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Movements in currency exchange rates can adversely affect the return of your investment.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

### The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may

not, in the aggregate, approximate the full Index.

- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

**For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>**

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Charges taken from the Fund over a year	
Ongoing charges	0.23%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their financial adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2020. This figure may vary from year to year. It excludes portfolio transaction costs.

### Vanguard LifeStrategy® 100% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy® Funds ICVC

### A GBP Income Shares

ISIN: GB00B545NX97

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

## Objectives and investment policy

- The Fund seeks to hold investments that will pay out money and increase in value through a portfolio comprising approximately 100% shares.
- The Fund will seek to achieve its investment objective by investing more than 90% of its assets in passive funds that track an index, which are managed or operated by the ACD or its associates ("Associated Schemes").
- The Fund will have exposure (through its investment in Associated Schemes) to shares of UK companies and non-UK companies (including emerging markets (i.e. countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body)). The UK will generally form one of the largest single country exposures for shares.
- The Fund may also invest directly in transferable securities (such as shares, bonds and other similar fixed income investments) (which will generally be components of the indices tracked by the Associated Schemes in which the Fund invests), money market instruments and deposits.
- The Fund is actively managed in that the Investment Adviser has discretion in respect of the Associated Schemes in which the Fund may invest and the allocations to them, each of which may change over time. The Investment Adviser manages the Fund through the pre-determined exposure to shares and bonds (and other similar fixed income investments), as detailed above.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management").
- The currency of the share class is GBP.
- The Fund makes investments which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is more appropriate for long term investments.
- Income from the Fund will be paid out.
- Portfolio transaction costs will have an impact on performance.
